1. When ordering, please specify **packaging** code:

C1099-ALD

Packaging: D = 13" machine ready reel. EIA-481 embossed plastic tape (200 per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge)

B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D

2. Inductance is for the primary, measured at 300 kHz, 1.0 Vrms.

3. Peak primary current drawn at minimum input voltage.

4. Primary DCR is measured with the windings connected in series. Secondary DCR is measured with the windings connected in parallel.

5. Leakage inductance is for the primary winding with the secondary winding shorted.

6. Turns ratio is for the primary connected in series and the secondary connected in parallel.

7. Output of the secondary is with the windings connected in parallel. Bias winding output is 14 V.

8. Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.

Dimensions are in $\frac{\text{inches}}{\text{mm}}$

Primary windings to be connected in series and secondary windings to be connected in parallel on the PC board.
