SMT Data Line EMI Filters – CDF

- See our PDLF series for 4, 3 and 2-line EMI filters
- Exceptional common mode noise attenuation from 15 MHz to 300 MHz; passes signal line data below 300 MHz with minimal attenuation
- DC current capacity of 500 or 100 mA.
- Excellent electrical isolation – 300 Vrms for 1 minute

Core material Ferrite
Terminations RoHS compliant tin-silver-copper over tin over nickel over phosph bronze. Other terminations available at additional cost.
Weight 330 – 345 mg
Ambient temperature −40°C to +85°C
Storage temperature Component: −40°C to +85°C.
Tape and reel Packaging: −40°C to +80°C
Resistance to soldering heat Max three 40 second refloows at +260°C, parts cooled to room temperature between cycles
Moisture Sensitivity Level (MSL) 1 (unlimited floor life at <30°C / 85% relative humidity)
Packaging 1000/13" reel Plastic tape: 16 mm wide, 0.46 mm thick, 12 mm pocket spacing, 4.5 mm pocket depth
PCB washing Tested to MIL-STD-202 Method 215 plus an additional aqueous wash. See Doc787_PCB_Washing.pdf.

1. When ordering, please specify termination and packaging codes:

Termination L = RoHS compliant tin-silver-copper over tin over nickel over phosph bronze. Other terminations available at additional cost.

Special order: S = non-RoHS tin-lead (63/37).

Packaging D = 13" machine ready reel. EIA-481 embossed plastic tape (1000 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer ($25 charge).

B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.

2. Frequency at which the differential mode attenuation equals −3 dB
3. Inductance shown for each winding, measured at 1 MHz
4. DCR is for each winding.
5. Interwinding isolation (hipot) tested for one minute.
6. Current rating is for each line.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.
