Flyback Transformer  
For TI 30 Watt PoE PSE Reference Design PMP20588

- Operates at 150 kHz with 6–32 Volts input.
- Isolation: 1500 Vrms, one minute pri and aux to sec; 500 Vrms pri to aux

**Core material**  Ferrite  
**Terminations**  RoHS tin-silver-copper over tin over nickel over phos bronze.  
**Weight**  24.3 g  
**Ambient temperature**  –40°C to +85°C  
**Maximum part temperature**  +125°C (ambient + temp rise).  
**Storage temperature**  Component: –40°C to +125°C. Tape and reel packaging: –40°C to +80°C  
**Resistance to soldering heat**  Max three 40 second refows at +260°C, parts cooled to room temperature between cycles  
**Moisture Sensitivity Level (MSL)**  1 (unlimited floor life at <30°C / 85% relative humidity)  
**Failures in Time (FIT) / Mean Time Between Failures (MTBF)**  38 per billion hours / 26,315,789 hours, calculated per Telcordia SR-332  
**Packaging**  24 per tray  
**PCB washing**  Tested to MIL-STD-202 Method 215 plus an additional aqueous wash. See Doc787_PCB_Washing.pdf.

### Specifications

</table>

1. Inductance is for the primary, measured at 150 kHz, 0.1 Vrms, 0 Adc.  
2. Peak primary current drawn at minimum input voltage.  
3. DCR for primary is per both windings connected in parallel.  
4. Leakage inductance is for the primary winding with the secondary windings shorted.  
5. Turns ratio is with the primary windings connected in parallel.  
6. Output of the auxiliary winding is 10.2 V.  
7. Electrical specifications at 25°C.  

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

The primary windings to be connected in parallel on the PC board.
