

Power over coax (PoC) filter solution for automotive application

SMD-POC-022S

Date:- 23rd September, 2019

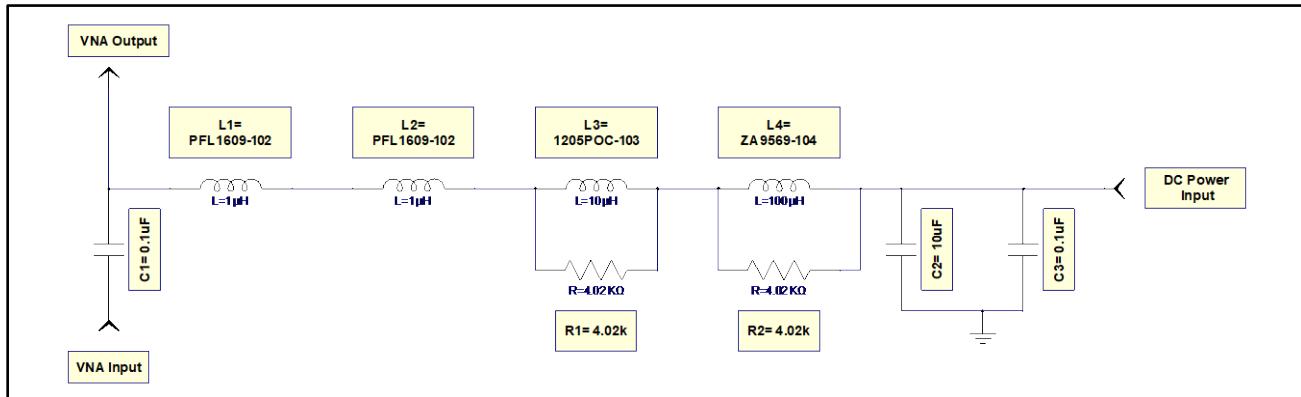

Overview:

Following application is designed to cover the frequency range from 8 MHz to 3 GHz for an impedance of $1\text{k}\Omega$, and 0.3A max current. The measurement of S-parameters are done on complete POC system in which two solution boards are connected through 2m length ofLeoni Decar-302 automotive cable. In complete POC system, max rating of the current are injected to get S-parameters under loads at different temperatures.
