1. Inductance is for the primary, measured at 300 kHz, 0.7 Vrms. For the GA3568-DL inductance is per winding.
2. Peak primary current drawn at minimum input voltage.
3. DCR for the secondary is with the windings connected in parallel. For GA3568-DL DCR for the primary is with both windings connected in parallel.
4. Leakage inductance is for the primary windings with the secondary windings shorted.
5. Turns ratios are for the primary (windings connected in parallel for the GA3568-DL) and with the secondary windings connected in parallel.
6. Output of the secondary is with the windings connected in parallel. Bias winding output is 5 V, 20 mA.
7. Electrical specifications at 25°C.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

Parts manufactured prior to December 2011 may be marked differently.
