Shielded Power Inductors – XAL1030

- Very high current and low DCR
- Low profile, only 3 mm high
- Soft saturation makes them ideal for VRM/VRD applications.

**Core material**  Composite  
**Environmental**  RoHS compliant, halogen free  
**Terminations**  RoHS compliant tin-silver over copper. Other terminations available at additional cost.

1. When ordering, please specify termination and packaging coded:
   - **XAL1030-102ME**
     - **Termination:** E = RoHS compliant tin-silver over copper.  
     - **Special order:** T = RoHS tin-silver-copper (95.5/4/0.5) or S = non-RoHS tin-lead (63/37).
     - **Packaging:** C = 7” machine-ready reel. EIA-481 embossed plastic tape (250 parts per full reel).  
     - Quantities less than full reel available: in tape (not machine ready) or with leader and trailer ($25 charge).
     - B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to C.  
     - **D** = 13” machine-ready reel. EIA-481 embossed plastic tape (1000 parts per full reel). Factory order only, not stocked.

2. Inductance tested at 1 MHz, 0.1 Vrms, 0 Adc.
3. DCR measured on a micro-ohmmeter.
4. SRF measured using Agilent/HP 4395A or equivalent.
5. DC current at 25°C that causes an inductance drop of 30% (typ) from its value without current.  
   - Click for temperature derating information.
6. Current that causes the specified temperature rise from 25°C ambient. This information is for reference only and does not represent absolute maximum ratings.  
   - Click for temperature derating information.
7. Electrical specifications at 25°C.  
   - Click for temperature derating information.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.
Shielded Power Inductors – XAL1030

L vs Current

L vs Frequency

- For optional tin-lead and tin-silver-copper terminations, dimensions are for the mounted part. Dimensions before mounting can be an additional 0.005 inch / 0.13 mm.

Recommended Land Pattern

Dimensions are in inches / mm.
