

Shielded Power Inductors - SER1590

Designed for high current, low voltage power supply applications, the SER1590 Series offers unmatched electrical performance in an extremely robust package.

With their heavy flat wire windings, these inductors have exceptionally low DC resistance and offer saturation current ratings up to 50 Amps. Winding to core isolation is 300 Vrms.

Designer's Kit C366 contains 4 of each value

Core and winding loss See www.coilcraft.com/coreloss

Storage temperature Component: -40°C to +125°C.

Tape and reel packaging: -40°C to +80°C

32 mm pocket spacing, 10.4 mm pocket depth

aqueous wash. See Doc787_PCB_Washing.pdf.

Terminations RoHS tin silver copper over copper. Other terminations

Ambient temperature -40°C to +85°C with (40°C rise) Irms current.

Maximum part temperature +125°C (ambient + temp rise). Derating.

Resistance to soldering heat Max three 40 second reflows at

Moisture Sensitivity Level (MSL) 1 (unlimited floor life at <30°C /

Packaging 250 per 13" reel; Plastic tape: 32 mm wide, 0.4 mm thick,

PCB washing Tested to MIL-STD-202 Method 215 plus an additional

+260°C, parts cooled to room temperature between cycles

Core material Ferrite

Weight 4.14 - 5.2 g

85% relative humidity)

available at additional cost.

1. When ordering, please specify termination and packaging codes:

SER1590-152MLD

Termination: L = RoHS compliant tin-silver-copper over copper. Special order: S = non-RoHS tin-lead (63/37).

- Packaging: D = 13" machine-ready reel. EIA-481 embossed plastic tape (250 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge).
 - B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.
- Inductance measured at 100 kHz, 0.1 Vrms, 0 Adc on an Agilent/ HP 4284A LCR meter or equivalent.

3. DCR measured on a Keithley 580 micro-ohmmeter.

- 4. SRF measured using an Agilent/HP 8753D network analyzer and Coilcraft SMD-D test fixture.
- 5. DC current at 25°C that causes the specified inductance drop from its value without current. Click for temperature derating information.
- 6. Current that causes a 40°C temperature rise from 25°C ambient. This information is for reference only and does not represent absolute maximum ratings. Click for temperature derating information. When Irms is greater than Isat, Isat is the more critical specification, and Irms is shown in gray type. See Temperature Rise vs Current curve on next page.

7. Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering
