RFID Transponder Coil – 4513TC

The 4513TC is Coilcraft’s best performing transponder coil designed for RFID applications at 125 kHz. It offers better sensitivity, greater read distance and higher SRF than other coils its size.

The coil is wound on a plastic base, providing great durability and allowing this part to withstand harsh mechanical shock. With operating temperature range to 125°C, these coils are ideal for a wide range of applications.

In addition to our standard models, Coilcraft can design transponder coils to operate at other frequencies.

To request free evaluation samples, contact Coilcraft or visit [www.coilcraft.com](http://www.coilcraft.com).

1. When ordering, please specify packaging code:

   4513TC-725XGLD

   Packaging: D = 13” machine-ready reel. EIA-481 embossed plastic tape (2500 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer ($25 charge).

   B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.

2. Inductance and Q measured using Agilent/HP 4192A impedance analyzer at 125 kHz. For recommended test procedures, contact Coilcraft.

3. Read distance measured using the KEELQC® Transponder Evaluation Kit part number DM303005 from Microchip. Distance was recorded as the voltage across the resonant circuit dropped below 10 mV.

4. Sensitivity measured in accordance with Coilcraft application note “Measuring Sensitivity of Transponder Coils.”

5. Matching capacitor value required for parallel resonant circuit operating at 125 kHz.

6. DCR measured on micro-ohmmeter.

7. SRF measured using Agilent/HP 8753D network analyzer.

8. Electrical specifications at 25°C. Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

Terminations RoHS compliant gold over nickel over phos bronze.

Weight 280 – 335 mg

Ambient temperature –40°C to +125°C

Storage temperature Component: –40°C to +125°C. Tape and reel packaging: –40°C to +80°C

Resistance to soldering heat Max three 40 second reflows at +260°C, parts cooled to room temperature between cycles

Moisture Sensitivity Level (MSL) 1 (unlimited floor life at <30°C / 85% relative humidity)

Temperature coefficient of inductance +50 to +210 ppm/°C

Packaging 2500 per 13” reel Plastic tape: 24 mm wide, 0.35 mm thick, 8 mm pocket spacing, 2.75 mm pocket depth

PCB washing Tested with pure water or alcohol only. For other solvents, see Doc787_PCB_Washing.pdf.

Conform to RoHS and AEC-Q200.
