SMT PFC Boost Inductor

For ON Semiconductor
NCP1606 PFC Controller

- Designed to operate in 100 Watt applications.
- Referenced as L_{BOOST} in application note AND8282/D.
- Auxiliary winding provides zero current detection (ZCD) information and can also supply power to the NCP1606.
- 500 Vrms winding to winding and winding to core isolation

Core material: Ferrite
Terminations: RoHS compliant tin-silver over tin over nickel over phosphor bronze. Other terminations available at additional cost.
Weight: 27 g
Ambient temperature: –40°C to +85°C with Irms current, +85°C to +125°C with derated current
Storage temperature: Component: –40°C to +125°C.
Tray packaging: –40°C to +80°C
Resistance to soldering heat: Max three 40 second refraows at +260°C, parts cooled to room temperature between cycles.
Moisture Sensitivity Level (MSL): 1 (unlimited floor life at <30°C / 85% relative humidity)
Packaging: 24 parts per tray
PCB washing: Tested with pure water or alcohol only. For other solvents, see Doc787_PCB_Washing.pdf.

1. Inductance measured at 100 kHz, 1.1 Vrms, 0 Adc using an Agilent/HP 4263B impedance analyzer or equivalent.
2. SRF tested on an Agilent/HP 4192A.
3. DC current at which the inductance drops the specified amount from its value without current.
4. Current that causes the specified temperature rise from 25°C ambient.
5. Electrical specifications at 25°C.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.
