

Wirewound Ferrite Beads 0402FL (1005)

- Higher performance than other surface mount ferrite beads in the market
- High impedance across a wide bandwidth
- Ferrite construction and heavy gauge wire for high current handling

- Maximum height reduced to 0.55 mm – 10% lower profile than competitive products
- Extremely low DCR for high current applications – as low as 0.065 Ohms
- Eliminates high frequency noise in power supplies or RF signal isolation applications
