## Shielded Power Inductors – XFL4030

- High current – up to 5.2 A
- Very low DCR – as low as 3.6 mOhms
- AEC-Q200 Grade 1 (–40°C to +125°C)

### Core material
Composite

### Environmental
RoHS compliant, halogen free

### Terminations
Tin-silver over copper. Other terminations available at additional cost.

### Weight
0.25 – 0.27 g

### Operating voltage
0 – 20 V

### Ambient temperature
–40°C to +125°C with (40°C rise) Irms current.

### Maximum part temperature
+165°C (ambient + temp rise).

### Storage temperature
Component: –55°C to +165°C.

### Tape and reel packaging
–55°C to +80°C

### Resistance to soldering heat
Max three 40 second refloows at +260°C, parts cooled to room temperature between cycles

### Moisture Sensitivity Level (MSL)
1 (unlimited floor life at <30°C / 85% relative humidty)

### Failures in Time (FIT) / Mean Time Between Failures (MTBF)
0.48 per billion hours / 2.08E+09 hours, calculated per Telcordia SR-332

### PCB washing
Tested with pure water or alcohol only. For other solvents, see Doc787_PCB_Washing.pdf

### Inductance
Inductance tested at 1 MHz, 0.1 Vrms, 0 Adc.

### DCR
DCR measured on a micro-ohmmeter.

### SRF
SRF measured using Agilent/HP 4395A or equivalent.

### DC current
DC current at 25°C that causes the specified inductance drop from its value without current.

### Current
Current that causes the specified temperature rise from 25°C ambient. This information is for reference only and does not represent absolute maximum ratings.

### Electrical specifications
Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

### Part number
XFL4030-471ME

1. When ordering, please specify packaging code:

**XFL4030-472ME**

**Packaging:**
- C = 7” machine-ready reel. EIA-481 embossed plastic tape (500 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer ($25 charge).
- B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to C.
- D = 13” machine-ready reel. EIA-481 embossed plastic tape. Factory order only, not stocked (2000 parts per full reel).

2. Inductance tested at 1 MHz, 0.1 Vrms, 0 Adc.

3. DCR measured on a micro-ohmmeter.

4. SRF measured using Agilent/HP 4395A or equivalent.

5. DC current at 25°C that causes the specified inductance drop from its value without current.

6. Current that causes the specified temperature rise from 25°C ambient. This information is for reference only and does not represent absolute maximum ratings.

7. Electrical specifications at 25°C.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

### Irms Testing

Irms testing was performed on 0.75 inch wide × 0.25 inch thick copper traces in still air.

Temperature rise is highly dependent on many factors including pcb land pattern, trace size, and proximity to other components. Therefore temperature rise should be verified in application conditions.

Shielded Power Inductors – XFL4030

Typical L vs Current

Typical L vs Frequency

Note: Parts manufactured prior to 2011 may not have orientation indicator.

Recommended Land Pattern

Packaging 500/7” reel; 2000/13” reel Plastic tape: 12 mm wide, 0.23 mm thick, 8 mm pocket spacing, 3.25 mm pocket depth

Dimensions are in inches/mm

* For optional tin-lead and tin-silver-copper terminations, dimensions are for the mounted part. Dimensions before mounting can be an additional 0.005 inch / 0.13 mm.
