Shielded Power Inductors – XAL1010

- High current – up to 98.8 A; very low DCR – 0.45 mOhms
- AEC-Q200 Grade 1 (–40°C to +125°C)
- Soft saturation makes them ideal for VRM/VRD applications.

**Core material** Composite

**Core and winding loss** See www.coilcraft.com/coreloss

**Environmental** RoHS compliant, halogen free

**Terminations** RoHS compliant tin-silver (96.5/3.5) over copper. Other terminations available at additional cost.

**Weight** 5.7 – 6.3 g

**Operating voltage:** 0 – 60 V

**Ambient temperature** –40°C to +125°C with (40°C rise) Irms current.

**Maximum part temperature** +165°C (ambient + temp rise). Derating.

**Storage temperature** Component: –55°C to +165°C.

**Resistance to soldering heat** Max three 40 second reflows at +260°C, parts cooled to room temperature between cycles

**Moisture Sensitivity Level (MSL)** 1 (unlimited floor life at <30°C / 85% relative humidity)

**Failures in Time (FIT) / Mean Time Between Failures (MTBF)** 0.48 per billion hours / 2.08E+09 hours, calculated per Telcordia SR-332

**Packaging**
- 300/13” reel
- Plastic tape: 24 mm wide, 0.4 mm thick, 16 mm pocket spacing, 10.21 mm pocket depth
- PCB washing: Tested to MIL-STD-202 Method 215 plus an additional aqueous wash

1. When ordering, please specify termination and packaging coded:

   **XAL1010-153MED**

   **Termination:** E = RoHS compliant tin-silver over copper.
   **Special order:** T = RoHS tin-silver-copper (95.5/4/0.5) or S = non-RoHS tin-lead (63/37).
   **Packaging:** D = 13” machine-ready reel. EIA-481 embossed plastic tape (300 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer ($25 charge).
   **B** = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.

2. Inductance tested at 1 MHz, 0.1 Vrms, 0 Adc.
3. DCR measured on a micro-ohmmeter.
4. SRF measured using Agilent/HP 4395A or equivalent.
5. DC current at 25°C that causes an inductance drop of 30% (typ) from its value without current.
   [Click for temperature derating information.](#)
6. Current that causes the specified temperature rise from 25°C ambient. This information is for reference only and does not represent absolute maximum ratings.
   [Click for temperature derating information.](#)
7. Electrical specifications at 25°C.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

---

**I rms Testing**

I rms testing was performed on 0.75 inch wide x 0.25 inch thick copper traces in still air.

Temperature rise is highly dependent on many factors including pcb land pattern, trace size, and proximity to other components. Therefore temperature rise should be verified in application conditions.

Shielded Power Inductors – XAL1010

Typical L vs Frequency

Dash number – Indicates direction of terminals and start (short) lead. Connect high dv/dt here for lowest EMI.

Recommended Land Pattern

*For optional tin-lead and tin-silver-copper terminations, dimensions are for the mounted part. Dimensions before mounting can be an additional 0.005 inch / 0.13 mm

Note:
Parts manufactured prior to March, 2014 may have a raised circular portion on top. The maximum height is the same for all parts.

Dimensions are in inches
