

## **PoE Transformers** For ST Microelectronics STE12PS PSE Power Controller

These surface mount flyback transformers were developed specifically for the ST Microelectronics STE12PS 12-Channel PSE Power Control Device.

They are designed to work with a 3.3 V input to provide a 12 V output. Isolation is 500 Vdc from each primary winding to the secondary winding.

Coilcraft can also design custom transformers with voltage, inductance and DCR values to meet your specific requirements.

For free evaluation samples, contact Coilcraft or order them on-line at **www.coilcraft.com**.

2. Inductance is for the primary, measured at 100 kHz, 0.1 Vrms, 0 Adc.

4. Leakage inductance measured on the primary windings with all second-

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.

3. Ipk is the peak current drawn at minimum input voltage.

6. Operating temperature range -40°C to +125°C.

7. Electrical specifications at 25°C

1. When ordering, please specify a packaging code:

DA2420-ALD

- Packaging: D = 13" machine ready reel. EIA-481 embossed plastic tape (175 per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge).
  - B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.
