1. **Termination:** E = RoHS compliant tin-silver-copper over copper (pins 1 – 2); RoHS compliant tin-silver-copper over matte tin over nickel over phos bronze (pins 3 – 4)

Packaging: D = 13" machine-ready reel. EIA-481 embossed plastic tape (90 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge).

- Inductance measured between secondary pins at 1 kHz, 0.1 Vrms.
- Maximum volt-time product for the secondary, based on 2000 Gauss.
- Primary current that causes approximately 40°C temperature rise from 25°C ambient. Higher current causes a greater temperature rise (see Temperature Rise vs Current curve).

This information is for reference only and does not represent absolute maximum ratings.

- Terminating resistance (R_T) value is based on 1 Volt output with 100 Amps flowing through the primary. Varying terminating resistance increases or decreases output Voltage/Ampere according to the following equation: $R_T \text{ (Ohms)} = V_{out} \times N_{sec} / I_{in}$
- Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.
