Flyback Transformers

For Texas Instruments TPS23750
PoE Powered Device Controller

- Isolated synchronous flyback transformers developed for Texas Instruments PMP929 reference design.
- Operates up to 500 kHz with 18 – 72 V input
- 1500 Vrms, one minute isolation primary and bias to secondary

Core material: Ferrite

Terminations: RoHS tin-silver (96.5/3.5) over tin over nickel over phos bronze. Other terminations available at additional cost.

Weight: 5.0 – 5.3 g

Ambient temperature: –40°C to +125°C

Storage temperature: Component: –40°C to +125°C. Tape and reel packaging: –40°C to +85°C

Resistance to soldering heat: Max three 40 second reflows at +260°C, parts cooled to room temperature between cycles

Moisture Sensitivity Level (MSL): 1 (unlimited floor life at <30°C / 85% relative humidity)

Failures in Time (FIT) / Mean Time Between Failures (MTBF): 38 per billion hours / 26,315,789 hours, calculated per Telcordia SR-332

Packaging: 200 per 13” reel. Plastic tape: 44 mm wide, 0.35 mm thick, 28 mm pocket spacing, 9.6 mm pocket depth

1. When ordering, please specify packaging code:

   **Packaging:**
   - **D** = 13” machine ready reel. EIA-481 embossed plastic tape (200 per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer ($25 charge).
   - **B** = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.

2. Inductance is for the primary, measured at 100 kHz, 0.1 Vrms.

3. Peak primary current drawn at minimum input voltage.

4. DCR for secondary is with windings connected in parallel.

5. Leakage inductance for the primary is with the secondary and drive windings shorted; leakage inductance for the drive winding is with the secondary windings shorted.

6. Turns ratio is with both secondary windings connected in parallel.

7. Output of the secondary is with the windings connected in parallel. Bias winding output is 10 V, 20 mA.

8. Electrical specifications at 25°C.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.

---

**Recommended Land Pattern**

- The secondary windings are to be connected in parallel on the PC board.

---
