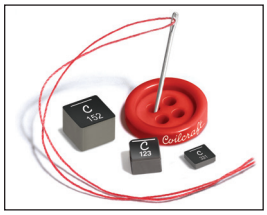
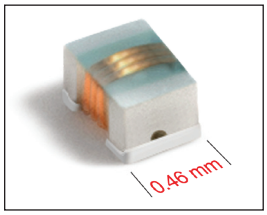
Part Number Index

New Products in Bold

Featured Products



- The industry's lowest DCR and ultra-low AC losses across a wide frequency range
- Available in a variety of sizes with inductance values from 42 nH to 56 µH
- Current ratings up to 117 A with soft saturation characteristics



- Measures just 0.58 x 0.46 x 0.35 mm
- Excellent Q compared to non-wirewound alternatives
- Very high SRF – as high as 35.2 GHz
- Ideal for high-frequency applications, such as cell phones, wearable devices, and LTE/5G IoT networks

- Current ratings up to 4.5 A with very low DCR
- 24 inductance values from 0.38 to 220 µH
- 4.0 × 4.0 mm footprint and only 1.0 mm tall!
- Magnetic shielding allows high-density mounting

MAGPro™ Design Tools

Coilcraft's MAGPro suite of online inductor analysis tools are designed to enable inductor selection and circuit optimization based on sound engineering principles and measured data.

Reduce your design cycle time with confidence at ...

Chip Inductors

RoHS/ REACH COMPLIANT

S-parameters & SPICE models ON OUR WEB SITE

Coilcraft chip inductors cover the range from 0.45 nH to 1,000 µH. All except the AF, DF, LS, 026011F and 0402FL Series are wound on ceramic bodies and offer exceptionally high SRFs, high Q and tight tolerances. Many parts are available with inductance tolerances as low as 1% at only a small premium. Coilcraft offers Designer's Kits that contain samples for prototyping. See page 55 or order on-line at www.coilcraft.com/en-us/kits/.

Which chip inductor family should you use?

	Ceramic (SUFFIX, BODY SIZE)				Ferrite (SUFFIX, BODY SIZE)				
Highest Q	DC 0402-0603	HP 0402-0805	HQ 0403-1008	CS 0402-1812	LS 0603-1812				
Lowest DCR	DC 0402-0603	HP 0402-0805	DS 0201		DF 0402	AF 0201-1008	LS 0603-1812	PB 0805	RB 0805
Highest I	HP 0402-0805				DF 0402	AF 0201-1008	LS 0603-1812		
Highest L	HL 0201-0603				DF 0402	LS 0603-1812			
Lowest Profile	CT 0402-1008				FL 0402

* Bold numbers indicate tolerances carried in stock. When ordering, please replace underscore in part number with the proper tolerance code: F = 1%, G = 2%, J = 5%, K = 10%. (e.g. 1812FS-105**K**C for a 10% tolerance part.)

Air Core Inductors

S-parameters & T-Line models ON OUR WEB SITE

These tight tolerance surface mount air core inductors combine the exceptionally high Q of an air wound coil with the convenience of surface mounting. Their flat top makes them suitable for automatic placement and reflow or vapor phase processing. Solder coated leads ensure reliable soldering. The **Square Air Core Inductors** are available in seven sizes and offer Q factors up to 230 and current handling as high as 5.7 Amps. The **GA309**x Inductors have high current ratings and low DCR. The **VS Series** have the highest current ratings and the lowest DCR. These inductors are the perfect solution for high-current IF/RF applications that require non-magnetic parts.

Conical and Broadband Inductors

Coilcraft BCR and BCL conical inductors offer a flat bandwidth with high impedance to 40 GHz, and are ideal for use in bias tees. The BCR has a full-length cap that fully protects the coil and provides a large surface for pick and place. The BCL has "flying leads" that allows adjustment of the mounting angle. The 4310LC has a flat bandwidth to 6 GHz, making it the perfect solution for lower bandwidth, high power applications.

BCL

Part number	Inductance ±5% (µH)	Bandwidth	DCR max (Ohms)	Irms (A) 40°C rise

SM RFID Transponder Coils

These Coilcraft transponder coils are designed for RFID applications at 125 kHz. The 4312RV and 5315TC were designed to withstand harsh mechanical shock and are well suited for use in tire pressure monitoring systems.

4308RV

Shielded Molded Power Inductors

S-parameters & SPICE models ON OUR WEB SITE

Coilcraft high-performance, high-frequency molded power inductors offer high current handling, soft saturation, and high efficiency in compact sizes. They come in a wide range of inductance values from 0.018 to 220 µH across seven product families: XGL, XEL, XAL, XFL, XAR, EPL, and PFL. Our next-generation XGL Family offers our lowest DC losses and extremely low AC losses for a wide range of DC-DC converters, from hundreds of kHz up to 5+ MHz. Additional performance benefits include a wider range of inductance values and improved Irms current ratings.

Which Molded Power Inductor is Right for You?

XAL	Widest range of sizes & high current
XFL	Low DCR & lowest profile
XEL	High current and low AC losses for high frequency
XGL (NEW!)	Lowest DCR, extremely low AC losses and widest inductance range

Which Molded Power Inductor is Right for You?

XAL	Widest range of sizes & high current
XFL	Low DCR & lowest profile
XEL	High current and low AC losses for high frequency
XGL (NEW!)	Lowest DCR, extremely low AC losses and widest inductance range

Which Molded Power Inductor is Right for You?

XAL	Widest range of sizes & high current
XFL	Low DCR & lowest profile
XEL	High current and low AC losses for high frequency
XGL (NEW!)	Lowest DCR, extremely low AC losses and widest inductance range

Which Molded Power Inductor is Right for You?

XAL	Widest range of sizes & high current
XFL	Low DCR & lowest profile
XEL	High current and low AC losses for high frequency
XGL (NEW!)	Lowest DCR, extremely low AC losses and widest inductance range

XGL6030

Shielded Ferrite Core Power Inductors

S-parameters & SPICE models ON OUR WEB SITE

Our LPS, LPZ, MSS and MOS Families of drum and sleeve power inductors come in a broad range of industry-standard footprints with many low-profile options. Choose inductance values ranging from 0.3 to 10,000 µH, current ratings up to 36.8 A and operating v oltage ratings up to 400 V. Their ferrite core construction yields flat L vs I and low loss for greater efficiency and they are magnetically shielded for high-density mounting.

Shielded High-Current Flat-Wire Power Inductors

S-parameters & SPICE models ON OUR WEB SITE

RoHS/REACH COMPLIANT

Our high-current, flat-wire power inductors offer current ratings up to 130 A and have exceptionally low DC resistance for greater efficiency. They come in five primary product groupings, with many AEC-Q200 qualified options available. AGP/AGM Family power inductors are ideal for high-efficiency power supplies requiring high current and high inductance. Our SER Family includes a wide range of sizes and inductance values for POL, VRM, VRD, and other high power applications. SLR/SLC Family inductors offer sub-milliohm DC resistance and tight DCR tolerances, making them ideal for multi-phase VRM/VRD/EVRD regulators.

Through-Hole Power Inductors

Coilcraft through-hole power inductors offer a wide range of inductance values and current ratings in a variety of sizes. These efficient, low-cost inductors are intended for DC-DC converters and are suitable for many other power and filtering applications. Body sizes are as small as 8.8 mm diameter (RFC0807) with heights ranging from 7.5 mm to 16 mm. Inductance values range from 0.9 µH to 18 mH. The RFS Series (three sizes) features magnetic shielding.

Dual Inductors for Class-D

Coilcraft offers a unique selection of dual inductors that significantly improve performance and reduce board area with a compact, single shielded package. Good linearity and ultra low total losses minimize total harmonic distortion plus noise (THD+N). With no crosstalk between windings, their high efficiency makes them ideal for use in handheld audio devices, portable docking stations, high-end TV soundbars, active speakers and subwoofers and automotive stereo audio systems.

Common Mode EMI/RFI Filters

Coilcraft offers EMI/RFI common mode chokes for the suppression of radiated and/or conducted EMI. Data/signal line filters such as our **USB** Family dramatically suppress common mode noise with minimal impact on high-speed differential signals. The **PFD**, **LPD** and **MSD** parts can be used to attenuate common-mode or differential-mode noise in both data and power line applications. Power line chokes like the **CMT** and **BU** Series reduce common mode noise from AC power.

Data Line Common Mode EMI Chokes

The **CJ5100**, **CQ7584**, and **CR7856** surface mount data line common mode chokes are designed to attenuate up to 100 MHz common mode noise. The **PDLF** Series can reduce noise by a factor of 32 from 15 MHz to 300 MHz and are available in 2, 3 and 4 line versions. The **PTRF** Series is optimized for FCC and ITU-T (formerly CCITT) requirements. These parts provide 15 to 25 dB attenuation, greater than 1000 Ohms impedance and 1500 V isolation between windings. **M2022** can suppress common mode noise up to 500 MHz in a compact 1812 package.

High-Speed Data Line EMI Chokes

Coilcraft's RA6870, CM1394 and USB Families of high-speed data line common mode chokes effectively reduce common mode noise in high-speed interfaces like USB 2.0, USB 3.1 Gen 1, HDBaseT™, MOST® bus, etc. They maintain excellent signal integrity for high-speed communications with the -3dB differential mode cutoff frequency up to 6.5 GHz. Most provide greater than 30 dB common mode attenuation at 500 MHz and 25 dB in the GHz band.

Surface Mount Power Line Common Mode EMI Chokes

Coilcraft's low-cost, high-performance surface mount power line common mode chokes come in a variety of sizes and packages. They are designed to eliminate AC line conducted common mode noise across a broad range of frequencies, with up to 1500 Vrms isolation. These common mode chokes can operate for a wide range of current from 0.06 Amps to 15 Amps, providing attenuation where line filtering is needed, such as in switch-mode power supplies.

Through-Hole Power Line Common Mode EMI Chokes

Coilcraft's low-cost through-hole **BU** Series high efficiency choke coils are designed to eliminate line conducted common mode noise across a broad range of frequencies. The **BU9S** and **BU9HS** are ideal for signal line applications; the other BUs can be used in switching power supplies and power supply circuits. For low profile applications, the **BU9** and **BU9S** filters are available in a horizontal configuration that reduces their height to under half an inch (12.5 mm).

CMT Common Mode EMI Chokes

Coilcraft's CMT toroid style common mode chokes are designed to provide the highest common mode impedance over the widest frequency range. These parts are ideal for any application requiring a high DC current bias and are well suited for use in switch-mode power supplies. These common mode chokes are most effective in filtering supply and return conductors with in-phase signals of equal amplitude. Differential mode inductors are available for filtering out-of-phase or uneven amplitude signals.

Wirewound Ferrite Beads

Wirewound ferrite beads cancel EMI for high frequency electronic noise suppression. Off-the-shelf beads prevent interference in power supplies and data lines as industrial and automotive grade noise filters for USB, CAN bus, PoC, ADAS, xEV, and Class-D audio amplifiers. These chokes will help to meet electromagnetic compatibility (EMC) standards such as FCC Title 47 CFR Part 15 and CISPR.

The Ultimate Kit for Antenna Matching

Why do so many users love our 0402DC Series Ceramic Chip Inductor Designer's Kit? To start, the 0402DC Series provides the industry's highest Q factors in its size to achieve super low loss in high frequency circuits.

The 0402DC is also offered in 112 inductance values from 0.8 to 120 nH – including 0.1 nH increments between 2.8 and 10 nH!

And, with 20 samples of every value, the C472-2 Kit is the perfect resource when you're designing impedance matching circuits for antennas in both lowband (700 – 960 MHz) and highband (1710 – 2700 MHz) applications.

Other features of the 0402DC include:

- Wirewound construction for extremely high SRF – up to 16 GHz
- DCR as low as 25 mOhm, significantly lower than other 0402-sized chip inductors

Order your C472-2 Designer's Kit directly on coilcraft.com!

Designer's Kits

To simplify your prototyping, we offer low cost Designer's Kits for many of our products. Each has an assortment of standard values along with detailed product specifications. We even offer free refills for the parts you use most often. To purchase, call **800-322-2645** or order your kits on-line at **www.coilcraft.com/en-us/kits/**.
