This family of inductors was designed for high current, low-voltage DC-DC converter applications, especially the latest generation of 3.3 V microprocessors. Current ratings up to 15 A rms and saturation currents up to 30 A are available.

These parts are only 8.0 mm high and have exceptionally low DC resistance thanks to the use of heavier gauge wire. The DO5022H Series has been optimized for reliable surface mounting with a large flat top and self-leaded design. In addition to the standard parts shown, custom values are available.

1. When ordering, please specify packaging code:

**DO5022H-153ML**

Packaging: **D** = 13” machine-ready reel. EIA-481 embossed plastic tape.

**B** = Less than full reel. In tape, but not machine ready. To have a leader and trailer added ($25 charge), use code letter D instead.

2. Inductance tested at 100 kHz, 0.1 Vrms.

3. SRF measured using Agilent/HP8753D network analyzer.

4. DC current at 25°C that causes an inductance drop of 10% (typ) from its value without current.

5. Current that causes a 40°C temperature rise from 25°C ambient.

This information is for reference only and does not represent absolute maximum ratings.

6. Operating temperature range –40°C to +85°C.

7. Electrical specifications at 25°C.

Refer to Doc 362 “Soldering Surface Mount Components” before soldering.
SMT Power Inductors - DO5022H Series
